SIGMA XI NATIONAL LECTURER  
TO SPEAK AT UM ON MAY 6

MISSOULA--

Dr. Hans J. Bremermann, the 1970-71 Sigma Xi national lecturer from the University of California, Berkeley, will speak at the University of Montana May 6.

Dr. Bremermann will discuss "Mathematical Biology" in a UM mathematics department colloquium May 6 at 3 p.m. in room 109 of the Math-Physics Building on the Missoula campus. At 7 p.m. May 6 he will present a formal lecture entitled "Mathematical Models for Biological Systems" in room 215 of the UM Women's Center.

Both programs are open to UM faculty and staff and interested townspeople without charge under the sponsorship of the Committee on National Lectureships of the Society of the Sigma Xi.

A native of Germany, Dr. Bremermann was graduated from Munster University there in 1951, receiving both his master's degree and doctorate.

He came to the U.S. in 1952 as a research associate and visiting professor at Stanford University, Palo Alto, Calif., and then returned to his native country for a year. In recent years he has taught in the U.S.

Dr. Bremermann became a U.S. citizen in 1965. He is a member of the American, German and Austrian Mathematical Societies, the German Society of Applied Mathematics and Mechanics, and the Biophysical Society.

Sigma Xi, organized for the encouragement of scientific research, selects national lecturers from among distinguished researchers who have made major contributions in their research fields. The Society of the Sigma Xi has approximately 110,000 active members in the country.

The national science honorary also awards small grants to Sigma Xi members who need less than \$1,000 for their work on college and university campuses.

Selection of individuals for membership in Sigma Xi is based on research potential or achievement.
